

MASTER COVER

unique sand covers - highest quality

SAND COVERS

High-quality sand covers with or without customised print for sandpits, long jump pits and beach volleyball courts. The perfect protection to prevention of animal faeces, branches, leaves and other debris.

MASTER COVER consists of a fine-meshed net that allows air to circulate and rain to seep away. We produce our covers individually to measure. Organic shapes and cut-outs are also possible. A precise fit and high quality are important for a long service life and an aesthetic appearance. We offer various types of fastenings, such as weighting chains, ground anchors or rubber tensioners with hooks.
